## EXPERIENCE

### Web Developer Intern

#### Aganitha Cognitive Solutions

Jan 2024 – Present

Hyderabad, India – On-site

- Designed and developed a REST API to deliver real-time server performance metrics (including CPU, memory, and graphics usage).
- Redesigned and developed a web application to visually display real-time server performance metrics.

### Contract Web Developer

#### Nooraari Crafts Producers Company Ltd

Sep 2023 – Oct 2023

Srinagar, Kashmir – On-site

- Designed and developed the company's website from concept to completion, establishing their online presence and effectively showcasing their products/services to a wider audience.
- Implemented SEO optimization strategies to improve the website's visibility and ranking on search engine results pages.
- Managed website hosting and deployment, ensuring availability of the company's online platform, which is currently live at [nooraari.com](#).

### Web Developer Intern

#### Skillhollistic

Nov 2022 – Feb 2023

Delhi, India – Remote

- Redesigned and developed the entire navigation bar for Skillhollistic's website.
- Converted the existing CSS codebase to Sass, improving code organization and maintainability.
- Collaborated with marketing team to integrate analytics tools, enhancing user behavior and website performance insights.

## PROJECTS

### Electricity Task Management System

- A software designed to manage and automate tasks within NIT Srinagar's electricity department.
- Admin can create, update, and delete rooms, users, and quarters. Operators can generate bills, add readings, and lock readings
- Currently used by NIT Srinagar Power Department for handling daily tasks.

### Vice Chancellor Hiring Web App

- A web application for Babasaheb Ambedkar Marathwada University, providing a centralized platform to streamline the hiring of Vice Chancellors.
- Efficiently deployed and secured the web application on the college's virtual machine, ensuring accessibility and data protection.

### JavaChat

- Java-based chat app enabling secure real-time communication.
- The application utilizes socket programming for establishing connections and exchanging messages.
- Incorporated a user-friendly graphical user interface (GUI) using Java's Swing library to enhance the user experience.

### Saqib Blogs

- Implemented full CRUD functionality for blog posts, allowing users to create, view, edit, and delete their blog posts
- Created RESTful API's that allows the frontend to communicate with the backend
- Deployed the app to a production environment, ensuring that it is secure, scalable, and reliable.

## ACHIEVEMENTS

- Organized a college eSports event attracting participation from over 60 gamers and attended by more than 100 enthusiastic spectators
- Achieved a top-tier score of 95% in a JavaScript proficiency examination conducted during an event hosted by NIT Srinagar.
- Solved over 250 diverse Data Structures and Algorithms (DSA) questions across reputable online platforms
